

MvixBOX Ultra-High Performance 2-Bay SATA NAS Server

The MvixBOX (WDN-2000) is a 2-Bay Network Attached Server, designed for storing, sharing and streaming digital media for homes and businesses. MvixBOX features a user-friendly interface with Web-Disk, Torrent Sharing, Dynamic Website Hosting, and Data Backup. With its simple configuration wizard, setting up the MvixBOX is a breeze. In fact, it is as easy to use as an external, portable hard drive. The MvixBOX is a perfect expandable and accessible storage solution for your home or business network.

The ultra-high-density file storage capability provides the freedom to store twice as much data and be able to access it via the internet - practically anywhere, anytime. The MvixBOX is a fast, reliable Linux-based server, with two built-in hard-drive bays that can host upto 2 Terabytes of storage. It can be connected directly to the network independently with an inbuilt capability of configuring and mapping file locations to the network attached devices. MvixBOX allows you to share files anywhere, anytime and offers a comprehensive suite of innovative and advanced features of online broadband technology.
